RE:

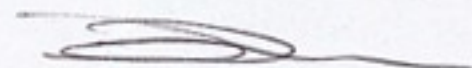

RE: Condensing Unit Protection

To whom it may concern

As a market leader in air conditioning, Toshiba obviously need to do extensive research into suppliers offering services, before we are able to use them, as we obviously need to ensure we protect our brand image.

Therefore before we used this product and Company, our Technical Manager visited the Bronz-Glow factory to assess the product and processes in place before conducting a field test. Following these tests we were happy to move forward with this Company and we have used Bronz-glow for a number contracts and find that their quality of work and Professionalism means that they are the only coil coating company who has achieved Approved Partner Status and we would have no hesitation in recommending their services.

Yours sincerely,

David Dunn  
Commercial Director
